OVERVIEW

AGNI PRAHAR is an AI-enabled interceptor quad UAV designed for rapid detection, tracking and neutralization of hostile drones. Integrated with radar-cued navigation, AI target recognition and autonomous lock-on capability, it delivers precision interception with minimal operator intervention. Built for modern battlefield airspace dominance.

KEY FEATURES

- ✓ AI-Assisted Target Lock & Tracking
- ✓ Radar-Cued Navigation / Detection
- ✓ Autonomous Terminal Homing
- ✓ High Speed Interceptor Platform
- ✓ Compact, Lightweight & Field Deployable
- ✓ Modular Payload Bay (Up to 500 g)
- ✓ Low Acoustic & Visual Signature
- ✓ Encrypted Data Link & Secure Communication
- ✓ GPS/GLONASS/BeiDou Compatible
- ✓ Auto Return / Abort / Mission Continuity

SPECIFICATIONS

	RANGE	5 km
	ENDURANCE	15 – 25 mins
